CAPABILITIES STATEMENT

About Us

Since 1994, GZ Software has designed, developed and marketed disease and condition specific electronic health records. Our cloud-based EHR's are ultra-secure, offer real-time views of patient records, and detailed reporting and registry outputs. When we build and implement your custom EHR, we improve clinical decision-making, patient safety, staff productivity and quality of care. The company's flagship product offerings include; *Lab Tracker-HIV™, Lab Tracker-Hemo™, WebTracker-Hemo™, WebTracker-Spina Bifida™, and HemaGlobal™. More at: www.labtracker.com

*Lab Tracker-HIV was acquired by Virco Labs, Inc. (now Janssen Diagnostics, Inc. a division of Johnson & Johnson) in December, 2009

Core Competencies

All of GZ Software's cloud-bases clinical EHR platform begin with an architectural skeletal frame. When our discovery process is complete, we interview your team, then write a detailed design specification. During the development phase, we build and integrate your exact specifications. The implementation process follows, then user orientation completes this process.

GZS Solutions

* Custom Built EHR and Registry to match your exact requirements
* Existing Off-the-Shelf Product Offering
* Integration of custom EHR with existing institutional EHR/EMR. Share Data.
* Standardized Nomenclature / Data Analytics
* Cloud-based EHR & Registry

Solutions For

* Government Entities / Ministry of Health
* Public Health / Surveillance Organizations
* Non-Government Organizations (NGO's)
* HMO / PPO Health Plans
* Hospitals and Hospital Systems
* Patient Advocacy Groups

Why GZ Software?

* **Maximizes existing resources** - no need to purchase or replace existing infrastructure
* **100% web-based** - Quick and easy to implement without the need for internal IS / IT support
* **Improves productivity** - The EHR and Registry mirrors clinical workflow for enhanced adoption and productivity
* **Proven reliability** - Founded in 1994, we celebrate 20 years of Hospital Informatics

DUNS

838647980

*In the early 1980s, the CDC referred to our home town of San Francisco as "Ground Zero" in the AIDS epidemic. We embraced the name as "GZ Software" and launched *Lab Tracker™ for HIV, our first Electronic Medical Record (EMR), in 1994.*
